

# NACE

NORTHERN AREA WESTERN CONFERENCE  
February 15-18, 2010 • Calgary, Alberta

Going for GOLD in Corrosion Prevention

February 2009

## CALL FOR PAPERS

The NACE Northern Area Western Conference has a long tradition of expanding the corrosion community's knowledge base through a strong technical program. The Western Conference also provides an opportunity for industry experts to enrich their work through the exchange of information and ideas that takes place during their conference presentations.

We are now pleased to be accepting abstracts for the 2010 conference in Calgary, Alberta!

We are looking for subjects that pertain to the understanding, detecting, managing, and monitoring of corrosion in all or any of its forms, regardless of the industry. Topics of interest include, but are not limited to:

- corrosion mechanisms (e.g. localized, cracking, MIC)
- pipeline/facility risk assessments
- monitoring
- inspection techniques
- mitigation (e.g. inhibition, coatings, environment modification)
- materials (e.g. non-metallics, alloys) and
- oilsands issues (e.g. erosion, water quality)

Please submit original abstracts in Microsoft Word format, including the title and names of authors to:
